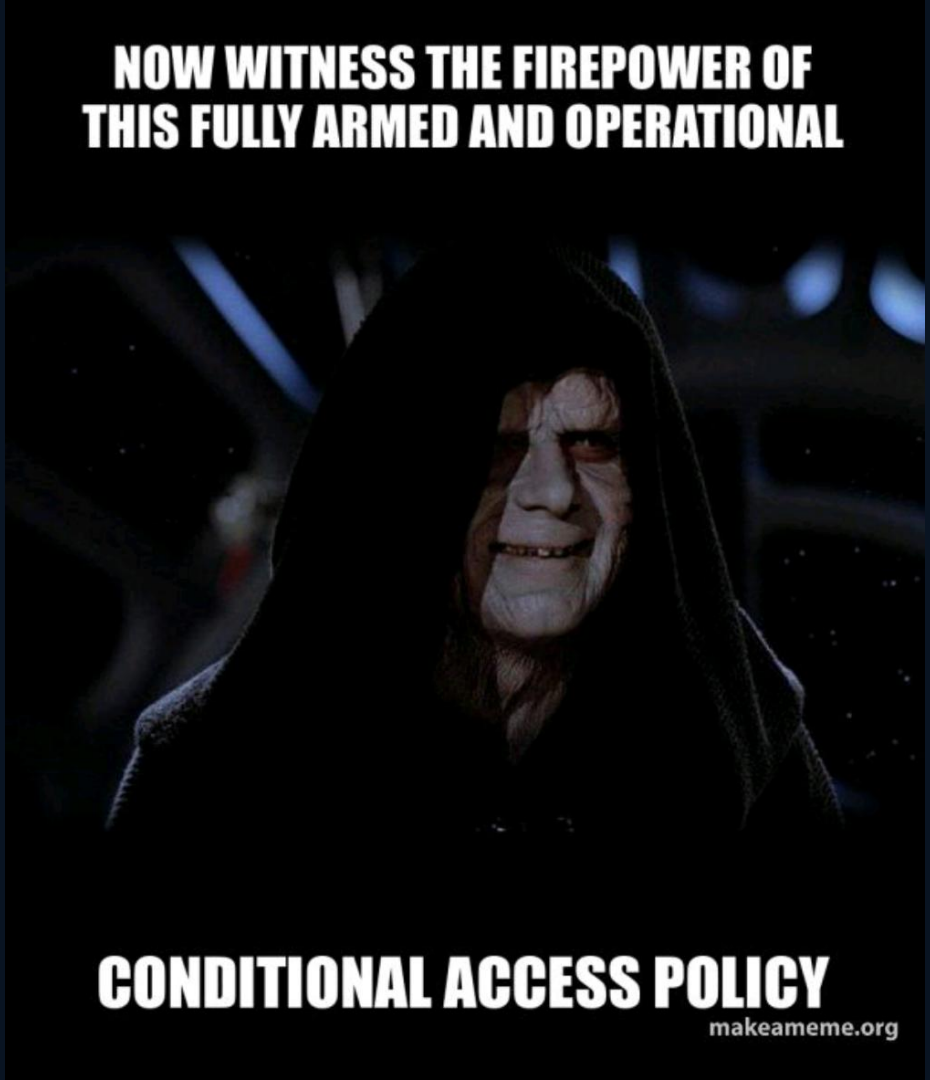
The BOSS Per-Torben goes to Spain

Oh no!



NIC REBEL EDITION

Why is Per-Torben blocked?

Our company is based in Norway

Sign-ins only allowed from Norwegian IP addresses

Other countries are blocked

NIC REBEL EDITION

🤔 Do we still need Geo block ? 🤔

Finnish GhatGPT answer: Yes!

Layer of protection

Network controls ≠ identity

Reduces noise

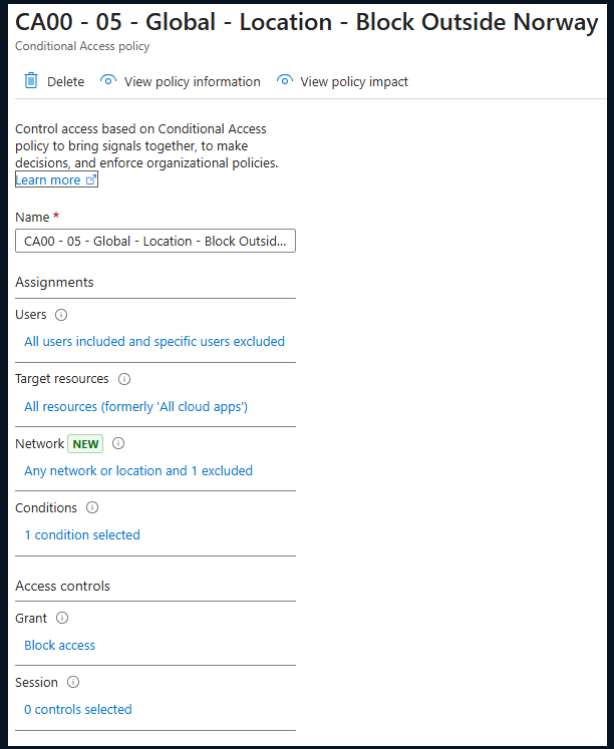
Failsafe against VPN/GSA error

Easy to implement

“Identity is the most valuable/vulnerable asset”
Sami NIC 2025

Geo block setup

- Keep the block-by-default design (NIC 2024 😉)
- Global policy (applies to everyone) blocks all countries except Norway



NIC REBEL EDITION

Secure vs. Flexible – can we have both?

Geo block exception

- Dedicated security groups
  - associated CA policies ➡️
- Group members can sign in from Norway + 1 other country
- 🚫 But adding users to a group will be a **permanent** exception

CA02 - 07 - Users - Location - Allow Norway+Croatia

CA02 - 08 - Users - Location - Allow Norway+France

CA02 - 09 - Users - Location - Allow Norway+Germany

CA02 - 10 - Users - Location - Allow Norway+Italy

CA02 - 11 - Users - Location - Allow Norway+Portugal

CA02 - 12 - Users - Location - Allow Norway+Scandinavia

CA02 - 13 - Users - Location - Allow Norway+Spain

CA02 - 14 - Users - Location - Allow Norway+United Kingdom

So, what just happened? 🤔

- Remember that I signed in with Authenticator app earlier?
- Teams SPO-site is connected to an **Authentication Context**
- This triggers a dedicated Cond.Access policy
- Protected by both FIDO2 and Sensitivity Labels
